TIMBER MERCHANTS AND SERVICE PROVIDERS

WinforstProNG is a modular software system that maps all processes, from the planning of the measure of the forest through logistics with warehousing, to entry to the plant. Due to the customized selection of function blocks (modules), every requirement is easily solved.

WinforstProNG is suitable for all sizes of commercial enterprises. All variants are offered, from a single-user installation on a PC or notebook to operation on the customer's server environment and convenient hosting in the cloud. You decide where your data is stored!

- Map-supported **MEASUREMENT PLANNING**
- Clear **CONTRACTS**
- Efficient **LOGISTICS**
- Automated **INVOICING AND CREDITS**
- Cost overview with **INFO CENTER**

CONTRACTS IN PURCHASING AND SALES

The contract module manages and monitors agreed quantities and prices. Whether as a price list for a verbal agreement, a closing letter, purchasing contract, contract for work and services or a service provider agreement. You keep track of open quantities, delivery conditions and prices at all times.

- Flexible price definition for timber
- Article price lists
- Support of all Incoterms (parities) in purchasing and sales
- Formation guidelines
- Ex stock purchasing with service provider accounting
- Delivery schedule with target/actual comparison by year/half-year/quarter/month/weeK

MAINTENANCE CONTRACTS, ACTION PLANNING AND TIME RECORDING

Walk-throughs, inspections, beetle searches and wildlife protection are planned and documented in the maintenance contract. The integrated calendar reminds you of upcoming appointments. Execution through timber harvesting and revenue through timber sales are presented in a clear performance record.

- Interfaces to surveying offices
- Mobile app for action planning
- Online/offline map material
- Creation of work orders
- Orders with planning of personnel, material and machines
- Target/actual quantity comparison
- Complete cost representation
- Time recording (vacation, compensatory time off, piecework)

LOGGING AND LOGISTICS

Collection logistics start as soon as the timber is ready for collection. The quantities are scheduled and an electronic delivery bill documents the removal.

- All assortments and units: FM, RM, SRM, ATRO, LUTRO, MWH
- Conversion factors between the units
- Trade-compliant data acquisition according to RVR / ÖHU
- Different measurement types: Treasury, harvester, forest and worksmeasure
- Photo-optical determination of number of units and volume
- Pile recording with residual quantity overview
- Provisioning with map support
- Transport order and delivery note
- Delivery bill and acceptance confirmation
- Online/offline logistics app
- Map display with adjustable basic maps and layers

DATA ACQUISITION AND IMPORT

The quantities of the plant protocols (FHP) are imported automatically. Plausibility queries draw the user's attention to any discrepancies.

- Import: ELDAT Classic, ELDAT SMART, FHP, Latschbacher WFP, and many more.
- Automatic import from mailbox (FHP)
- Quality check: e.g. according to length retention and grade

SALES AND PURCHASING

The delivery note reconciliation allows you to keep track of whether plant data exists for each delivery. The timber sales module enables you to create invoices in five steps. Thanks to customer and supplier data, assigned contracts and logistics information all being stored in CRM, invoices for timber data are generated automatically at the push of a button.

- Alignment → delivery bills with works reports
- Different units possible for sales, purchasing and service
- Wizards for the creation of serial documents

- GoBD compliant
- Automatic pricing from contracts
- Supplier accounting
- Service provider billing
- Payments on account (Akonto)

EVALUATIONS AND INTERFACES

Documents can be transferred to FIBU systems such as BMD, DATEV, SAP etc. Different info centers provide the collected data in an easy to understand way. Using data bars, colors and conditional formatting, WinforstProNG focuses on the essentials so that you can make the right decisions.

- FiBu and SEPA interfaces
- Contribution margin accounting
- Invoice journal
- Individual statistics and reports

MORE THAN 1100 CUSTOMERS CONFIRM THE EFFICIENCY OF WINFORSTPRO!
