

CARRIERS AND HAULIERS

Transporting timber from the forest to the plant is a demanding process subject to extensive requirements. Our logistics modules accompany this process transparently and are easy to use for all employees.

The entire logistics route, from contracts to transport quantities, prices and invoicing can be found in WinforstProNG. All processes from the transport order to arrival at the plant are documented for a complete record.

- Compatible with the Austrian **FHP LOGISTICS STANDARD**
- Online and offline **APPS**
- Documentation with **GPS AND PHOTOS**
- End-to-end solution, **FROM PROVISIONING TO DELIVERY CERTIFICATE**

EVERYTHING AT A GLANCE, RIGHT FROM THE START

Contracts or price lists, quantity-based or according to kilometer zones with surcharges or discounts, form the billing basis for a transport service.

- Overview of delivered/open quantities
- Free pricing according to distance in KM, place of departure, region in map (geofencing)
- Definition of special services, e.g., direct hours, tolls, diesel price adjustments

LOGISTICS, SORTED

Logistics processes are complex and diverse. Whether it's via the supplier's provisioning messages or direct transport orders with a delivery bill to the plant - WinforstProNG supports all disposition options with practical wizards.

- Various disposition wizards
- Serial creation of transport orders from delivery bills or provisionings
- Automatic forwarding of transport orders to drivers
- Route calculation (KM, time, road type)
- Control of credit notes
- Accounting of deliveries
- Invoicing of additional services (direct hours)
- Follow-up costing
- Revenues and costs per vehicle / driver
- Grouping of drivers into teams
- Sub-transport assignment
- Acceptance confirmations of consignees
- "Everything at a glance" dashboard: planned quantities per calendar week, expired transport orders

AN APP FOR EVERY PURPOSE

The fully configurable app ensures simple and clear data entry. A permissions system allows selected users to schedule in the app as well.

- APP for Android and iOS
- Simple commissioning via QR code or configuration file
- Delivery note creation in only three clicks
- Online and offline functionality
- Permissions system
- Call function for contact persons
- Navigation incl. offline maps
- High data quality through selection fields with predefined values
- Filter function for data and map view
- Adjustable display and mandatory fields
- Transshipment to semitrailer, wagon, warehouse
- Status messages for transport orders

YOUR DATA, YOUR DECISION – COMPLETE TRANSPARENCY

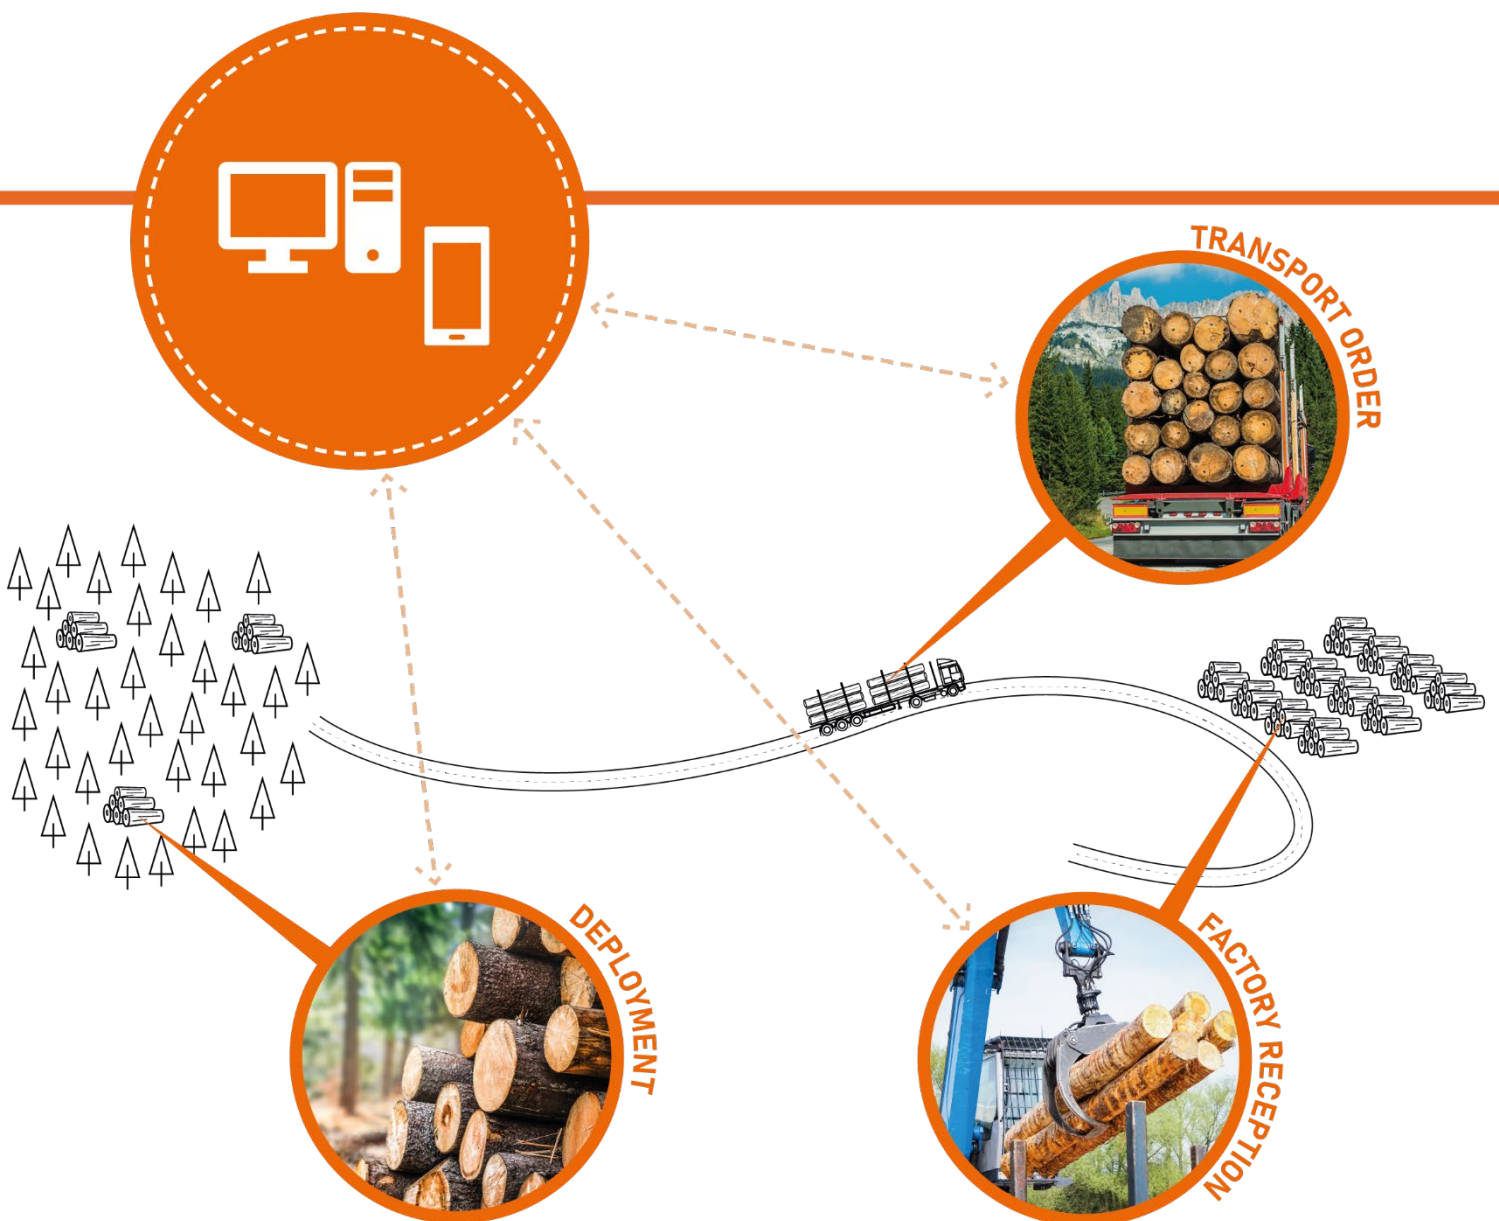

You decide who gets what data in the communication process. Shipping profiles enable you to define for each business case (trade, brokerage, service) which party receives what data.

FOR EVERY SIZE OF BUSINESS

Smaller companies with only a few trucks use the simple delivery note creation, without software in the office. Orders and delivery bills are created in the mobile APP.

Larger companies with centrally organized dispatch can take advantage of the freight calculation and billing functions to the fullest extent. For drivers from different linguistic backgrounds, the app can be set to different languages.

MORE THAN 2,000 TRUCKS ARE ALREADY INCREASING THEIR EFFICIENCY WITH OUR LOGISTICS SYSTEM!
