SPLIT STOPPER PREMIUM LOG S

Stops cracks with one strike

WWW.INTED.CO.AT

Printing errors, changes and deviations in the sense of technical development reserved.

**HOLDS FIRM
WITH EXISTING
TOOLS.**

THE TECHNOLOGY

The new Premium Log S log split stopper has been specially developed for use with the Signumat system. It fits exactly into the same magazine as our marking tags and enables protection and marking in a single operation. Slightly smaller than the well-known Log L, the Log S is nevertheless characterized by its excellent tensile strength and simplicity!

With the optimally coordinated tooling for attaching logtags and split stoppers, you can work faster, more efficiently and more comfortably. The tags and split

stoppers are always within reach – either via the practical double magazine or via a single magazine.

The special plastic material convinces with an exceptionally high tensile strength and reliably prevents further tearing of cracks.

Despite its high stability, the valuable wood split stopper remains suitable for sawing and can be processed without any problems. Even when wet and stored for a long period of time, it remains colorfast – and thus reliably prevents depreciation due to discoloration of the wood.

- **Fast:** Attach with just one stroke thanks to precise, tilt-proof 4-point attachment
- **Tensile strength:** Extreme resistance thanks to fiber-glass reinforced engineered plastic
- **Simple:** Easy individual removal with the Signumat hammer from the Signumat magazine.

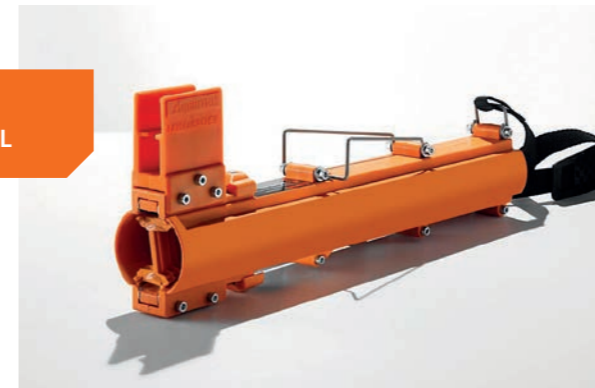

- **Stable:** Robust bridge for better tensile strength
- **Lightweight:** Guaranteed penetration into hard wood or sawn timber

THE EQUIPMENT

EASY INSTALLATION

EASY REMOVAL

EASY TRANSPORT

SIGNUMAT HAMMER

The forged Signumat hammer with ball joint allows the insertion of tags and valuable wood split stoppers with a single blow due to its flexible design. The handle is ergonomically shaped and made of impact-absorbing wood.

AUTOMATIC ACCEPTANCE MAGAZINE

Thanks to its ingenious design, the magazine enables the individual removal of valuable wood split stoppers and tags in seconds with the Signumat hammer. Also individually expandable or available as a double magazine, the system allows you complete flexibility!

SIGNUMAT CARRYING BAG

With the Signumat magazine including a carrying bag, you have 40 tags or split stoppers in reserve – ready to use. In the bag provided for this purpose, an additional 200 pieces are possible.
